

EZ-Count designed for you, the grower.

EZ-Count makes it easier for you to order the correct number of units for your farming operation. You can now buy soybeans like corn seed, by seed count. Every unit contains 140,000 seeds per bag (7,000,000 seeds per tote). If you grow soybeans in a 15 inch row you would need to order 1.4 units per acre (200,000 seed per acre divided by 140,000 seeds per bag). Your seeding rate should be adjusted based on your farming conditions. Seed treatment, heavy soil type and late planting all have impact on the seeding rate that you may use.

To make it easier to order the correct number of NK® EZ-Count soybean seed units and EZ-Count Totes, please use the following chart.

Planting Rate	Bags per acre required	Totes per 25 acre	Planting Rate	Bags per acre required	Totes per 25 acre
145,000	1.04	0.52	200,000	1.43	0.71
150,000	1.07	0.54	205,000	1.46	0.73
165,000	1.18	0.59	210,000	1.50	0.75
170,000	1.21	0.61	215,000	1.54	0.77
175,000	1.25	0.63	220,000	1.57	0.79
180,000	1.29	0.64	225,000	1.61	0.80
185,000	1.32	0.66	230,000	1.64	0.82
190,000	1.36	0.68	235,000	1.68	0.84
195,000	1.39	0.70	240,000	1.71	0.86
